

CESAR DORI

617-620-7329 | cesar_d@mit.edu | cesar-dx.github.io/cesar-portfolio/ | linkedin.com/in/cesar-dori/ | Cambridge, MA

EDUCATION

MASSACHUSETTS INSTITUTE OF TECHNOLOGY, SLOAN SCHOOL OF MANAGEMENT

Cambridge, MA

Candidate for Master of Business Analytics, Operations Research Center, August 2026, GPA: 4.8/5.0

2025 - Present

- **Relevant Coursework:** Agentic AI, NLP, Deep Learning, Machine Learning, Optimization
- **NLP Project:** Evaluating whether LLM-generated synthetic agent trajectories can replace real data for AI agent training
- **Deep Learning Project:** Multi-modal price prediction leveraging visual and textual inputs (Python, PyTorch)
- **Teaching assistant for AI Edge:** Developing Python notebooks on deep learning and ML deployment for 80+ students
- **Fellowship:** Selected for MIT's AI Alignment group exploring safety and governance challenges in frontier AI systems

IMPERIAL COLLEGE LONDON

London, United Kingdom

Master of Mechanical Engineering (MEng), GPA: First Honors

2020 - 2024

- **Awards:** Dean's List; Engineer in Business Fellowship (2nd Place)
- **Research:** Predictive modeling of stress-strain response of additively manufactured steel (Fortran, MATLAB)

TECHNICAL SKILLS

- Python (pandas, PyTorch, scikit-learn), BigQuery, LangChain, LangGraph, FastAPI, Vercel, OpenAI/Anthropic API

EXPERIENCE

MIT SLOAN | JACKFRUIT AI

Cambridge, MA

Founding Team & Engineer, MIT AI Studio – Awarded 1st place out of 49 Teams

Jan. 2026 - Present

- Built validation pipelines and agentic tooling for ARF, a production agentic readiness scoring system spanning 144 checks across 11 categories (identity, observability, safety, multi-agent interoperability); deployed on Railway (FastAPI) and Vercel
- Designed automated scanners using the Anthropic Batch API across 3 tiers (HTTP, GitHub, Cloud IAM) to evaluate AI readiness across 500+ open-source organizations
- Engaged with 5+ enterprise CTOs to validate our agentic readiness framework against real production AI deployments

MIT SLOAN | VEG ER for PETS | Sequoia-backed veterinary emergency hospitals

White Plains, NY

Machine Learning Engineer Intern, MIT Capstone Project

Feb. 2026 - Present

- Developing an LLM pipeline (GPT-4o) to extract structured clinical features from 1.7M free-text ER notes for faster, scalable case auditing
- Building a clinical case-archetype ontology that standardises ER visit classification and helps Medical Directors identify target audit opportunities

MIT SLOAN | ITRADENETWORKS | Leader in perishables supply chain management solutions

Cambridge, MA

GenAI Lab Team Member – Awarded 2nd place out of 27 Teams

Jan. 2026 - Present

- Built a production multi-agent negotiation engine in LangGraph + Claude, deployed on Render and Vercel - production adoption interest from iTradeNetworks CTO
- Enforced hard business rules (price floors, quantity ceilings) with a human-in-the-loop gate for enterprise deal approval
- Built an evaluation harness tracking deal rate and negotiation efficiency, with a full audit trail and explainable AI routing for non-technical supervisors

MIT SLOAN | FIDELITY INVESTMENTS

Cambridge, MA

Analytics Lab Team Member

Fall 2025

- Benchmarked OLS against Random Forest, XGBoost, and Neural Networks across ~1,000 PE funds to predict quarterly net asset value within a 10.6% MAPE
- Presented technical findings and model recommendations to a mixed audience of 35 Fidelity engineers and PMs at their HQ

THE BRADERY | France's No. 1 fashion e-commerce startup

Paris, France

Data Analyst Intern

Sep. 2024 - Mar. 2025

- Built a production pipeline integrating OpenAI and Shopify APIs to generate 10,000 product descriptions at scale on the client-facing website (Python, BigQuery)
- Replaced manual vendor triage with an automated scheduled job, reducing customer service spend by \$23K

ADDITIONAL INFORMATION

- Languages: French (Native), Italian (Native), Spanish (Conversational)
